September 8, 2021

Dear parents,

As part of the required vision screening for the state of Ohio, your child may have their vision tested. Tentatively, the date that I will be completing these exams is Tuesday, September 14, 2021. This will be based on his/her grade level or need. If you have any questions, please contact me via phone or email. If a follow-up is needed regarding additional vision testing, you will receive a letter stating whether your child(ren) did not pass the test for color blindness, visual acuity, or both. As a reminder, if your child is already prescribed glasses or contacts, please be sure that they are wearing them to school each day. Also, if your child already requires corrective measures, they will still be having their vision tested to ensure that their prescribed strength is still adequate.

Thank you,

Mandi Bartlomain BSN, RN
