PHONE: [330]385.5588 FAX: [330]385.1267

Dear Parents,

In February, we at East Liverpool Christian School are pleased to offer a unique opportunity to our school community, students, and student-athletes in particular. Through their athletic division, Cappel Health brings comprehensive cardiovascular testing to high schools, colleges, universities, and sports facilities across the country. On February 20th and 21st, ELCS will welcome Cappel Health to our school, where they will provide a preventative Cardiovascular Testing Program for our student athletes. We at ELCS strongly encourage any student, age 12 or older, who currently participates in athletics or will potentially participate in athletics to take advantage of this unique opportunity for preventative, non-invasive cardiovascular testing, designed to detect heart conditions that may put him or her at risk of a cardiac episode. While this opportunity is intended for and focused on our student athletes at ELCS, appointments are open to anyone within our school community over the age of 12 including faculty, staff, parents, older siblings, etc.

Per Lindsay's Law in Ohio, our faculty, school staff, and coaching staff are trained in emergency response procedures for sudden cardiac arrest, including the use of AED machines which are on-hand here at ELCS and all ELCS athletic events. However, the testing provided by Cappel Health affords opportunity for our student athletes to identify conditions in advance, if they exist, and prevent a cardiac arrest before it occurs.

According to Cappel Health, the conditions detected by these tests are not identified in normal physical exams required for participation in team sports or an EKG alone. Furthermore, athletes who have suffered sudden cardiac arrest due to these unidentified conditions typically were completely asymptomatic prior to the cardiac event. These tests are designed to detect these conditions and provide what could be lifesaving information.

Please carefully read the attached information then schedule an appointment for your child's cardiovascular testing and complete the necessary consent form by scanning the QR Code and visiting the website(s) below. All testing will be done on site here at ELCS. Student privacy and confidentiality will be maintained at all times. Any significant findings will be communicated immediately; detailed results will be received within three weeks of your child's appointment. ***Please note, we must secure thirty appointments at minimum in order for Cappel Health to provide this service. If we do not reach the required minimum, all appointments will be cancelled.***

Best regards,

Peggy Bouscher

Principal, East Liverpool Christian School

Step 1: Scan the QR Code or visit the website below to register for cardiovascular testing.

<http://go.cappohealth.com/fmi/webd/East%20Liverpool%20Christian%20School>

Step 2: Visit the website below to complete the consent form after you have registered your student-athlete.
